

SAFETY UPGRADE FOR NEW & EXISTING MIXERS

GUIDE BAR LOCKOUT

An Occupational Safety and Health Administration (OSHA) must-have!

Myers Mixers guide bar lockout is designed to be a safety lock for lifted-position mixers.

Mechanically prevents the machine from coming down, while at the same time electrically locking out controls for an added layer of protection.

Available in carbon steel or stainless steel construction.

Upgrades available for new or existing mixers.

Make your stance on safety known— opt for Myers Mixers guide bar lockouts and use them whenever the machine is raised!
