

DRUM GUARD

The Myers Mixers Drum Guard makes safety a snap. Insert 55 gallon drum, add materials, and clamp the cage shut. Feed chute makes additions to the batch safer and faster by protecting operators from potentially dangerous moving parts, as well as dust and vapors. Many feed chute styles are available for all mixing and dispersing requirements.

- No need to stop the machine to make additions to the batch.
- Lower the risk of material inhalation with a covered drum.
- Improve operator safety.
- Ensure the drum stays at the correct location for best mixing.
- Custom designs available for all mixers sized for use with 55 gallon drums.

FROM LEFT: Several standard drum guard cover style options are available. Cone style, hinged style, telescoping cover, and hopper style.
