

THROUGH - THE - FLOOR HIGH SPEED DISPERSERS

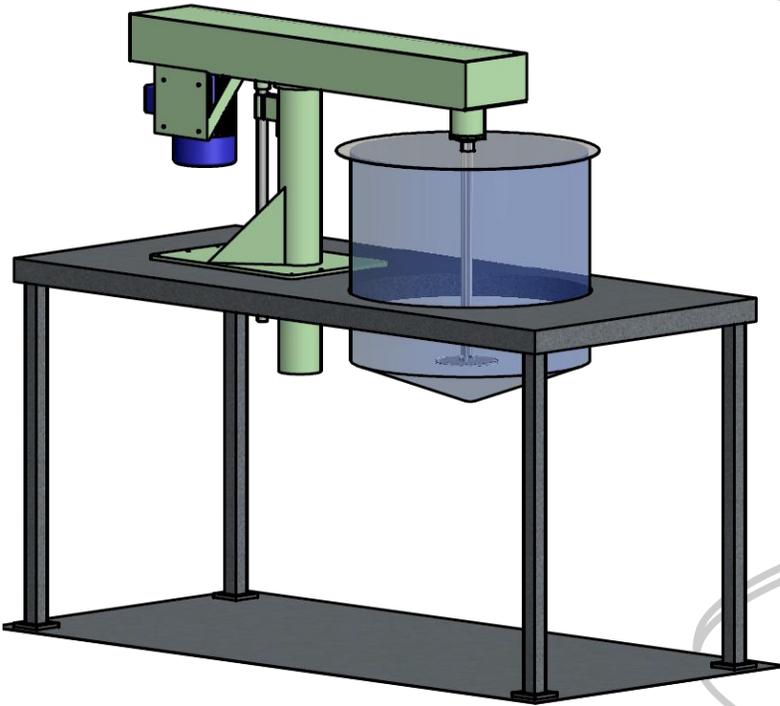

Myers Mixers manufactures through-the-floor style dispersing units. Many of the Myers Mixers series of agitators, dispersers, and mixers can be custom engineered for through-the-floor design.

Benefits of this style include:

- Requires less ceiling height
- Saves floor space
- Increases batch size
- Finished batches can be gravity discharged to holding tanks or canning equipment on the floor below.
- Installing tanks in the floor holds heights to the most convenient loading level.
- Load cells

Other features include:

- Up to 400 HP
- Up to four tanks and positions with the same mixer
- Through-the-floor installations available for most hoist-mounted mixers and dispersers.

ABOVE: 800 Series through-the-floor on mezzanine.

BELOW: Mezzanine-mounted through-the-floor 850 Series dual-shaft quad-blade disperser.
